

SYSTEM AND METHOD FOR DEVICE CONFIGURATION AND
MANAGEMENT USING A UNIVERSAL SERIAL BUS PORT

ABSTRACT OF THE DISCLOSURE

- 5 A method and system for configuring and managing devices including
network devices, such as a server computer, is provided in which a computer (24) is
coupled to the network device through a USB connection (22). After the computer
(24) recognizes the device as a USB-compliant device, the computer establishes data
communication with the device. Following the establishment of data communication
10 according to the USB standard, the device can be configured or monitored through the
computer.
